cutaneous DECONGESTION facial LIFTING muscular TONING

**Advanced Electrolifting System**

# The VitaLift®

This ultramodern device is specially designed to offer sophisticated aesthetic care treatments. Professional aestheticians are now able to propose a wide range of high-performance electrolifting treatments with the ease of this computerized system.

By sending a specific microcurrent to the facial muscles, the VitaLift® initiates a gentle muscular stimulation. This process strengthens muscles, firms the skin and enhances blood circulation in order to produce a healthy and invigorating effect on the treated area.

## The VitaLift® Facial Lifting Mode

The VitaLift® mode offers you four treatment options designed to give the face a smooth and youthful aspect.

### Facial Drainage

- Improves blood and lymph circulation
- Promotes toxin elimination
- Clears up the complexion and minimizes dark circles under the eyes

### Automatic Stimulation (self-adhesive electrodes)

- Firms the skin
- Tones the muscles
- Yields a lifting effect and reduces the appearance of wrinkles
- Remodels the facial oval

### Specific Stimulation (hand-held electrodes)

- Stimulates a specific set of muscles in each area of the face (eyes, lips, chin, etc.) to meet the needs of each client

### Personalized Stimulation

- Designed to create and program advanced stimulation treatments in automatic or specific mode

## The VitaLize™ Mode

The VitaLize™ mode will allow you to offer specific ionophoresis treatments (ionization/deep-cleansing) for the face. While deep-cleansing emulsifies excess sebum on the skin surface for in-depth cutaneous cleansing, ionization enhances the absorption of active skin products in the epidermis. A great addition to all your beauty sessions!

## The VitaPhase® Option

VitaLift® facial electrolifting treatments may also be combined with the VitaPhase® IM and SM dermaphasic devices. This unique option allows you to offer active ionomassage and stimulomassage treatments, in order to obtain even better results! Brilliant, isn't it!

Offer visible results to your clients with VitaLift®!
