Vita-Lux™

ADVANCED LIGHT THERAPY SYSTEM

Illuminate your beauty!

Vita•Lux™ THE ADVANCED LIGHT THERAPY SYSTEM

In addition to offering the three essential colours in aesthetic care, namely blue, red, and green, the Vita•Lux™ includes StimuloMassage and IonoMassage functions with transcutaneous infusion, pulsing light therapy, a timer, three VitaPhase™ devices (IM, SM, LT), as well as two VitaPhase™ connections that can be activated simultaneously. What type of treatment can this system deliver? Anti-acne care, calming and anti-couperose care, stimulating and collagen fibre regenerating care, and more... Vita•Lux™, an aesthetically designed, convenient system that is easy to use and that allows you to offer the latest effective light-based treatments...

Light Therapy

Mode

Working in synergy with the VitaPhase™ LT device, this mode is used to perform light-based treatments. With 21 light-emitting diodes (LED), it offers 3 colours, each with specific properties:

- **Blue:** anti-acne, antibacterial, sedative.
- **Green:** calming, balancing, vasoconstrictive, visibly reduces capillaries, clarifying.
- **Red:** stimulation of fibroblasts to promote collagen and elastin formation and cellular renewal. Stimulation of blood and lymph circulation. Anti-cellulite.

All 3 colors can also be pulsed.

IonoMassage

Mode

Working in synergy with the VitaPhase™ IM device, this mode is used to enhance product effectiveness and to perform various facial and body treatments: transcutaneous infusion, deep-cleansing, soothing and antibacterial care, vibromassage, and more... Here's what it can do:

- Enhances penetration of active ingredients (+, -);
- Restores the skin's natural pH level (+);
- Reduces redness, inflammation, irritation and oedema (+);
- Soothing, germicidal, vasoconstrictive action (+);
- Cleanses the skin by emulsifying sebum and activates microcirculation (-);
- Active vibromassage.

StimuloMassage

Mode

Working in synergy with the VitaPhase™ SM device, this mode is used to perform facial and body microcurrent stimulation, chromotherapy and vibromassage. With 10 stimulation electrodes and 5 light-emitting diodes (LED), it delivers multiple effects:

- Provides a stimulating effect to the skin;
- Promotes cellular renewal;
- Revitalizes and tones the skin;
- Enhances penetration of products;
- Relaxing vibromassage.

Also available, the optional VitaPhase™ IR (InfraRed), used to stimulate collagen, elastin, circulation and cellular renewal at even greater depth. Find out about it!
